Work History

**Dec 2019 -
Current**

Software Architect/Project Manager Team Lead

Samsson Systems and investment limited (Bell international), Victoria Island, Lagos

- Customized in-development software to clients' current hardware environments, designing applications to span multiple systems.
- Authored development guidelines to expedite application design efforts through ready-made frameworks.
- Participated in weekly meetings with client to discuss project direction and milestone achievement.
- Created migration strategies to bridge development gaps between existing software architecture and future updates.
- Constructed architecture governance processes, communicating parameters to development staff during adoption training.
- Mentored team, sharing skills and expertise and encouraged each member to bring forward ideas and suggestions for improvement.
- Drafted visual representations of software architecture design for presentation to stakeholders.
- Assessed under-performing software and developed actionable improvements.
- Monitored and tested application performance to identify potential bottlenecks, develop solutions, and collaborate with developers on solution implementation.
- Managed use of various types of databases and configured, installed and upgraded new ones.
- Provided 2nd and 3rd level technical support and troubleshooting to internal and external clients.
- Worked closely with customers, internal staff and other stakeholders to determine planning, implementation and integration of system-oriented projects.

**Jan 2015 -
May 2019**

Operations Manager

Palmercedar Limited, Yaba, Lagos

- Devised processes to boost long-term business success and increase profit levels.
- Worked in matrix management environment with oversight of division level managers, operations, sales, finance, human resources, safety and compliance.
- Helped build and review master service agreements for work eligibility.
- Reviewed shift reports to understand current numbers and trends.
- Spearheaded department training for appraisals of new components.
- Investigated and resolved departmental non-conformances.
- Planned and resourced personnel and logistics for operations component exercises resulting in highly trained personnel ready to act quickly in critical roles.
- Formulated processes to improve assistance to support groups, resulting in reduction of downtime and financial loss.
- Boosted team member productivity by enhancing performance monitoring and instituting motivational approaches.
- Tracked trends and suggested enhancements to both challenge and refine company's product offerings.
- Coordinated leadership workshops to educate team members on best practices to optimize productivity.

May 2009
- Jan 2015
